

Prof. Agustín Romero Medina  
Universidad de Murcia  
Editor, Anales de Psicología

July 20<sup>th</sup> 2017

Dear Professor Medina:

I am writing you as the first author, and on behalf of my co-authors, in order to submit a study for publication in the journal Anales de Psicología. The study is entitled: “Penn State Worry Questionnaire – 11 validity in Colombia and factorial equivalence across gender and nonclinical and clinical samples.”

The manuscript focuses on the psychometric analysis of the Penn State Worry Questionnaires (PSWQ) in Colombian samples of clinical and nonclinical participants. It includes 4 tables and 1 figure.

In our view, this study is important because it establishes the psychometric properties of the PSWQ in Colombia and analyses for the first time the factorial equivalence across gender and nonclinical and clinical samples.

We believe Anales de Psicología is the most appropriate outlet for the publication of this study, and that it will be of interest to the readership of the journal. We hope you consider this study for publication. If you need any further information, please do not hesitate to contact me at franciscoj.ruizj@konradlorenz.edu.co. Looking forward to hearing from you soon.

Sincerely,

Dr. Francisco J. Ruiz
